

# MODEL: DAK20

## Product Data Sheet

Don Alarm Kit with Don Alarm Pro

### DESCRIPTION

Don Alarm Pro (DA20) is a professional-grade pressure monitoring device for a building water system. Don Alarm Pro provides an immediate alert (audible beep and digital display) when the water pressure is outside of normal limits (too high or too low). Don Alarm Pro's digital display allows users to view the current pressure, minimum and maximum pressures, and last pressure alarm, all with time/date stamps.

The low alarm has an adjustable range of 0 to 35 psi and the high alarm is adjustable from 50 - 140 psi.

### FEATURES

- 24/7 Continuous pressure monitoring to detect harmful and dangerous water pressure (hi or lo)
- Commercial-grade, 5-year warranty
- Digital display of current, minimum, maximum and alarm pressure events
- Lighted digital display allows viewing in dark / low-light conditions
- Audible alert when pressure is too high or too low
- Adjustable Hi / Lo pressure alarms
- Standard plumbing connection
- 12-Hour Sleep Mode, Latched alarms
- Battery-powered with low battery indicator
- Easy installation, connect & go
- No monthly fees, Patented technology

### OPERATING SPECIFICATIONS

Maximum Operating Pressure	160 psi
Hi Alarm Range	50 - 145 psi

Lo Alarm Range	0 - 35 psi
Operating Water Temperature Range	20 - 120 °F
Plumbing Connections	Compression (3/8" OD Tubing)
Power Source	2, AA Batteries
Pressure Tolerance	± 3 psi
Unit Weight	Approx. 1 Lb
Unit Dimensions	6" x 6" x 3"

### USES AND APPLICATIONS

- Potable & industrial water systems
- Commercial, Industrial, Residential
- Plumbing system troubleshooting

### INSTALLATION

Install Don Alarm Pro in-doors, on a pressurized potable water system (cold water is recommended). Water must be free from particulates or contaminants that could damage the sensing element and void warranty. Mount in an upright position (as shown below) to prevent debris from damaging internal components.

### SIZE AND COMPONENTS

- Don Alarm Pro (DA20)
- 3/8" compression supply hose
- 3/8" compression tee

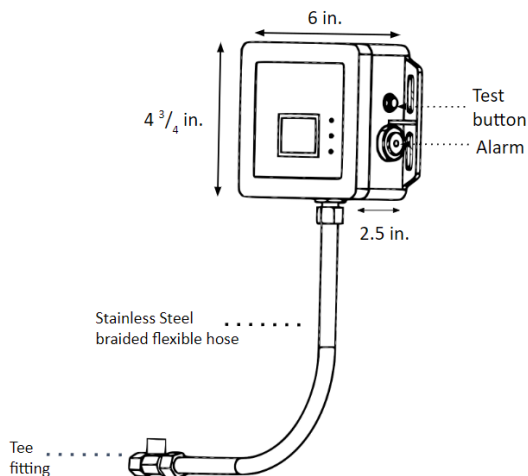

Fig 1. Don Alarm Pro, Mounted Upright.

### LOW BATTERY INDICATOR

When it's time to change the batteries, a low battery symbol will be displayed on the digital screen. If the batteries are not replaced in a timely manner, the display will turn off and a low battery alert (3 quick beeps) will sound every 30 seconds, until the batteries are replaced or the existing batteries are completely depleted.

### MAINTENANCE

All plumbing systems and components require maintenance and should be carefully inspected annually (and more frequently as systems age) by a plumbing professional. In order to ensure proper performance, Don Alarm Pro should be inspected at least once per year. Make sure the display pressure is accurate, there are no leaks or moisture around the unit, and the alarm beeps by pressing the test button.

### WARRANTY

Don Alarm Pro is covered by a 5 year limited warranty. This warranty covers defects in materials and workmanship under normal use and service. If the product fails to function as intended due to a manufacturing defect, we will repair or replace it free of charge. This warranty does not cover damage caused by misuse, abuse, accidents, modifications or improper installation. Don Alarm Company liability is limited to products manufactured by us and exclude all property or other damage. To submit a warranty claim, please contact our customer service team and provide proof of purchase. Our team will guide you through the process and ensure that your issue is resolved as quickly and efficiently as possible.

### CONTACT US

We are here to help. If you need technical assistance, support, or just have a question, please reach out to us by phone, email, via our website or mailing address as listed below. We appreciate your business and look forward to hearing from you.
